EDUCATION

BMS Institute of Technology & Management

BE, Computer Science and Engineering | CGPA: 8.31

Bengaluru

2024 – 2027

Government Polytechnic Zalaki

Diploma, Computer Science and Engineering | Percentage: 88.00%

Vijayapur

2021 – 2024

PROJECTS

Aircraft Detection and Classification using YOLOv8 Python, OpenCV, CNN, TensorFlow

[GitHub Repo](#)

- Developed an AI-based Aircraft Detection and Classification System using YOLOv8 and Deep Learning for real-time recognition of military aircraft, commercial airplanes, helicopters, and drones.
- Built a complete end-to-end computer vision pipeline including automated dataset collection, image preprocessing, auto-labeling, object detection, aircraft cropping, and multi-class classification.
- Trained and optimized custom YOLOv8 detection models and CNN-based classification models on a self-curated dataset containing multiple aircraft categories such as Rafale, F-16, MiG-29, Boeing 737, Apache Helicopter, and UAVs.
- Implemented real-time and video-based aircraft recognition with confidence-based confirmation logic to reduce false detections and ensure reliable bounding box classification.

Educational Learning Platform for Rural Schools HTML, CSS, JavaScript, Bootstrap

[GitHub Repo](#)

- Designed and developed a multilingual educational website for underprivileged schools to provide foundational learning in English, Hindi, and Kannada.
- Organized educational content into modular sections such as English Grammar, Kannada Jnanpith Award Winners, Math Formulas, and Tourist Places in Karnataka.
- Implemented a responsive user interface using Bootstrap and JavaScript to enhance usability across mobile and desktop devices.
- Integrated interactive learning features and structured educational modules to improve student engagement and support self-paced learning.

INTERNSHIP EXPERIENCE

AI/ML Intern

IVIS LABS Pvt. Ltd

Jan 2024 – April 2024

Mysore, Karnataka

- Worked on real-world AI/ML projects involving data preprocessing, model training, evaluation, and deployment.
- Developed and tested machine learning models using Python and frameworks such as TensorFlow and Scikit-learn.
- Applied machine learning algorithms and neural network concepts to improve model accuracy and optimize performance.
- Performed data cleaning, feature engineering, and model evaluation using standard AI/ML techniques.

TECHNICAL SKILLS

Languages: C, Java, HTML/CSS, Python

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV, Matplotlib

Developer Tools: Git, GitHub, Visual Studio Code, ChatGPT

Interests: Problem Solving, Competitive Programming, Web Development, Cooking
